

PolyGard® Transmitter ADT03-3400 for combustible gases, NRTL Certified

DESCRIPTION

ADT transmitter with digital processing of the measured values and temperature compensation for the continuous monitoring of the ambient air and detection of combustible gases and vapours. The calibration routine with selective access release enables the comfortable calibration of the transmitter. In addition to the standard analog output (0) 4-20 mA or (0) 2- 10 V DC the ADT-03 is equipped with a RS-485 interface for different protocols. Two relays with adjustable switch threshold are available as an option.

APPLICATION

The transmitter is used within a wide commercial range for detecting flammable gases and vapours. Due to the output signal and the RS-485 interface the transmitter ADT-03 is compatible to the PolyGard gas controller series MGC and DGC by MSR-E as well as to any other electronic control or automation system.
